PROFILE

Development economist with over six years of experience in economic research and data analytics. Research on climate change, poverty, labor markets and financial inclusion in Mexico, combining microdata, causal inference and machine learning to produce policy-relevant evidence. Experience leading teams and coordinating with government, civil society and private sector counterparts.

WORK EXPERIENCE

Financial Researcher

2021–Present

Banco de México (Banxico)

Research on the intersection of climate change, poverty and financial stability in Mexico. Analysis of large administrative and survey microdata to assess how climate shocks affect household consumer and mortgage credit. Contributions to the Financial Stability Report and to internal analysis supporting monetary policy decisions. Leadership of research teams on specific projects.

Data Analysis Manager

2021

Banorte

Development of machine learning algorithms to evaluate experiments and support evidence-based business decisions.

Research and Teaching Assistant

2020–2021

CIDE

Machine learning and synthetic control analysis of the employment effects of minimum wage changes, with scenario estimation on wages and development. Teaching assistant for the Introduction to Data Science course.

Supply Chain Manager

2013–2019

Studio Ceri Luxury Design

Head of the Mexican logistics and purchasing division of an Italian design and construction firm. Direct supervision of 5 to 20 people. Coordination between headquarters in Italy, local suppliers, contractors and clients.

Consultant

2012–2013

Accenture

Development of forecasting tools to improve cost efficiency through accurate predictions.

PROJECTS

Targeting of a social solar panel program

2025

Consulting project for IDEA (Instituto de Desarrollo, Energía y Ambiente) and SENER
Led a team of three to design a multicriteria index identifying the most vulnerable and suitable municipalities for a federal social solar panel program, and an interactive dashboard to explore all underlying variables. Main liaison between IDEA and SENER.

Mathematics Lecturer

2025

SAE Institute

Teaching of a mathematics course.

EDUCATION

MSc. Development Economics

2019–2021

CIDE – Final grade 9.6/10

Award for best empirical thesis of the master program.

MSc. Supply Chain Management

2010–2013

Politecnico di Milano – Final grade 109/110

BSc. Management Engineering

2007–2010

Politecnico di Milano – Final grade 104/110

Exchange Program

2011

ETSI – Sevilla

PUBLICATIONS AND WORKING PAPERS

Neighborhood Marginalization and Labor Market Disparities in Mexico

2025

With J. Miguel Manrique-Velasco. Latin American Economic Review, Vol. 36, Special Issue: 50th Anniversary of the Division of Economics of CIDE

Two-way fixed-effects analysis of census data (2010–2020) showing that higher neighborhood marginalization reduces formal employment and wages and increases informality, with heterogeneous effects by gender and age. doi:10.60758/laer.v36i.442

Dry Weather, Dry Wallet? Heterogeneous Uses of Financial Tools during Dryness in a Middle-Income Economy

Forthcoming

European Economic Review

How populations with different sociodemographic characteristics use distinct financial tools to cope with drought-related distress, and the implications for future access to credit. SSRN

Moral Force, Contagious Force: Partisanship, Leadership, and Public Health Compliance during COVID-19

2025

Working paper – Honorable Mention, 2025 Banamex Award

How leaders' actions influenced whether individuals complied with social distancing orders during COVID-19.

Local Labor Market Response to a Natural Disaster in an Emerging Economy: The Case of Hurricane Otis in Mexico

2025

Working paper

Synthetic control estimation of the aggregate employment effect of Hurricane Otis in the affected areas.

SKILLS
